

GV20

3G Vehicle GNSS Tracker

The GV20 is a fully-featured, highly competitive and cost-effective 3G multi-functional GPS tracker developed for vehicle, motorbike, and bus tracking. It offers you crystal clear real-time tracking details, including location, route, playback, and more, even in a tough environment. It supports remote fuel/power cutoff and also provides you with the vehicle's ignition status. Wherever you go, its instant alert notifications allow you to react accordingly and immediately.

GPS & LBS Positioning

Two complementary positioning systems ensure the locations to be accurately displayed on cloud platform.

9-90V Operating Voltage

Wide operating voltage range is suitable for a huge variety of vehicles, including industrial equipment, scooters, golf carts, and more.

Remote Cut-Off (Fuel/Power)

Immobilize a vehicle by cutting off its power source/fuel supply via an installed relay.

WCDMA & GSM Network

Able to receive and transmit data in the coverage of 3G and 2G network.

IP65 Dust and Water Resistance

Rugged design ensures continued optimal performance, even in the toughest conditions.

Tamper Alert

Receive an alert when the device is removed from the vehicle.
